

# Contents

Foreword	3
Contents	7
Scope	11
Definitions	13
1 Information required by the Steelwork Contractor	17
1.1 Allocation of design responsibilities	17
1.2 Project Specification for structural steelwork	17
Table 1.1 Proposed works – Checklist	18
Table 1.2A Design – Checklist	18
Table 1.2B Design – Checklist	20
Table 1.2C Design – Checklist	20
Table 1.3 Building Information Modelling (BIM) – Checklist	21
Table 1.4 Workmanship – Checklist	22
Table 1.5 Erection – Checklist	23
Table 1.6 Protective treatment – Checklist	23
Table 1.7 Inspections and tests – Checklist	24
Table 1.8 Programme – Checklist	24
2 Materials	25
2.1 Constituent products	25
2.2 Steel products	25
Table 2.1 Material and dimension standards	26
Table 2.2 Maximum thickness (in mm)	28
2.3 Welding consumables	29
2.4 Structural fasteners	29
Table 2.3 Matching ordinary (non-preloaded) assemblies	31
Table 2.4 Matching preloaded assemblies	32
Table 2.5 Ordinary tie bar assemblies	33
Table 2.6 Matching ordinary tie bar assemblies	34
Table 2.7 Holding down assemblies	35
Table 2.8 Cup and countersunk non-preloaded assemblies	36
2.5 Shear studs	36
2.6 Reinforcing steel	37
2.7 Protective treatment materials	37
2.8 Proprietary items	37
2.9 Substitution of material or form of components	37
3 Information provided by the Steelwork Contractor	39
3.1 Information system	39
3.2 Building Information Modelling	39
3.3 General arrangement of components	39
3.4 Foundation and wall interface information	40
3.5 Fabrication information for components	40
3.6 Erection information	42

3.7	Drawing or information review	42
3.8	'As erected' structure	43
4	Workmanship – general	45
4.1	Identification	45
4.2	Handling	46
4.3	Cutting and shaping	46
4.4	Machining	47
4.5	Dressing	47
4.6	Holing	47
4.7	Assembly	48
4.8	Curving and straightening	48
4.9	Inspection	49
4.10	Storage	49
4.11	Accuracy	49
5	Workmanship – welding	51
5.1	General	51
5.2	Welder qualification	51
5.3	Welding procedures	51
5.4	Assembly	53
5.5	Testing of welds	54
5.6	Shear stud welding	57
5.7	Welding of reinforcement steel to structural steel	57
6	Workmanship – bolting	59
6.1	Ordinary (non-preloaded) bolt assemblies	59
6.2	Fit-up if using non-preloaded bolt assemblies	60
6.3	Preloaded bolt assemblies	61
	Table 6.1 Modified combined method	62
6.4	Fit-up if using preloaded bolt assemblies	62
7	Workmanship – accuracy of fabrication	63
7.1	General	63
7.2	Permitted deviations for rolled components after fabrication ( $\Delta$ )	63
7.3	Permitted deviations for elements of fabricated components ( $\Delta$ )	65
7.4	Permitted deviations for plate girder sections ( $\Delta$ )	68
7.5	Permitted deviations for box sections ( $\Delta$ )	72
7.6	Permitted deviations for lattice components ( $\Delta$ )	74
8	Workmanship – erection	77
8.1	General	77
8.2	Site conditions	78
8.3	Pre-construction information	78
8.4	Stability	79
8.5	Erection loads	79
8.6	Lining and levelling	79
8.7	Site welding	80
8.8	Site bolting	80
8.9	Certification of completion	80

9	Workmanship – accuracy of erected steelwork	81
9.1	Permitted deviations for foundations, walls and foundation bolts ( $\Delta$ )	81
9.2	Foundation inspection	83
9.3	Steelwork	83
9.4	Deviations	83
9.5	Information for other contractors	84
9.6	Permitted deviations of erected components ( $\Delta$ )	84
10	Protective treatment (corrosion and fire)	93
10.1	General	93
10.2	Paint systems	93
	Table 10.1 Generic protection coating specifications	94
10.3	Intumescent systems	95
	Table 10.2 Generic specification for intumescent systems	97
10.4	Surface Preparation	97
10.5	Application and inspection of coatings	99
	Table 10.3 Sampling plan	101
10.6	Coating of surfaces to be encased in concrete	103
10.7	Hot dip galvanising	103
	Table 10.4 Post-galvanising inspection	104
10.8	Metal spraying	105
11	Quality management	107
11.1	Competence of Steelwork Contractor	107
11.2	Quality system	107
	Table 11.1 Technical knowledge of Responsible Welding Coordinator	109
11.3	Additional inspections and tests	109
11.4	Records	109
11.5	Modifications	110
Annex A		111
Weld testing – hold times		111
	Table A Recommended minimum hold times	111
Annex B		113
Welds – extent of routine supplementary non-destructive testing		113
	Table B Extent of routine supplementary NDT	113
Annex C		115
Welds – acceptance requirements and measurement definitions		115
	Table C.1 Acceptance requirements for production welds in steel structures	115
	Table C.2 Measurement definitions for production welds in steel structures	118
Annex D		119
Guidelines for visual inspection of welds		119
Annex E		121
Requirements for Execution Class 3 – static structures		121
	Table 11.1 Technical knowledge of Responsible Welding Coordinator (EXC3 – static)	123

Table B	Extent of routine supplementary NDT for EXC3 (static)	124
Annex F		125
Guidance on Execution Class 3 – fatigue		125
F.1	Introduction	125
F.2	Typical buildings subject to fatigue	125
F.3	Role of the Engineer	125
F.4	Fatigue design	126
F.5	Detail categories	126
F.6	Fabrication requirements for fatigue sensitive structures	127
Annex G		129
Definitions from the Construction (Design and Management) Regulations		129
Annex H		131
Referenced standards		131
